

TOOLING SYSTEMS

Introducing Kennametal's Newest Quick-Change Tooling Systems

*KM25: Your perfect choice for OD turning!
KM3225: Superb ID endworking performer!
Through-coolant ready!*

**Engineered specifically to optimize
your machining operations —
no matter how challenging your
particular application!**

- Half the cost of comparable systems!
- The world's most economical, rigid, and accurate modular quick-change tooling!
- Dramatically reduce your machine downtime... can be fully and easily employed on your lathe or mill-turn machine — with no modifications necessary!
- Ideal for 30HP (22KW) or less equipment!

Kennametal will significantly boost your machine utilization!

Let us prove it.
